-----------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Biography

Jiamin Wan's graduate education is in hydrology and geochemistry. Since graduation, she has been employed in the Earth Sciences Division of Lawrence Berkeley National Laboratory, and is currently a Staff Scientist. Her research is focused on interfacial, wetting, and capillary phenomena in geologic materials, and on biogeochemical reactions and subsurface transport of contaminants, colloids and nanoparticulates. Her studies under high-pressure and high-temperature reservoir conditions combine pore-scale microscopy of fluid interfacial dynamics with surface spectroscopy and macroscopic interfacial measurements to understand mechanisms controlling CO₂, water, and oil interactions. She currently has over 80 publications (25/81 as the first author) in peer-reviewed journals. She has been the lead principal investigator for many projects over the past two decades, obtaining funding through competitive peer-reviewed processes.

Research Interests

- **Interfacial phenomenon in hydrogeological media:** Dynamic wetting and fluid-fluid interfacial tensions under atmosphere and elevated (deep subsurface) pressures and temperatures; colloid stability, partitioning, and transport.
- **CO₂ enhanced oil recovery (CO₂-EOR):** altering CO₂ apparent viscosity (using foams) and varying wettability to control fluids mobility; to test these in high-pressure micromodels and cores.
- **Hydraulic fracturing:** developing new fracturing fluids as the alternative to water-based fracturing fluids; understanding the fluids-rock interactions and manipulating the interfacial properties.
- **Geological CO₂ sequestration:** studies of mechanisms controlling CO₂ mobility and trapping, and caprock integrity through pore-scale microscopy, surface spectroscopy, and macroscopic interfacial measurements under elevated P-T conditions.
- **Contaminant biogeochemistry and plume remediation:** studies of reactions, transport, and remediation of contaminants including U and Cr.
- **Soil C and N transport and transformations and their impacts on C cycling:** from the unsaturated zone to groundwater.

Education

- Ph.D. Hydrology, 1989-1993, New Mexico Institute of Mining and Technology, NM, USA
- Ph.D. Candidate in Geochemistry, 1986-89, New Mexico Institute of Mining and Technology, NM, USA (past the candidacy exams and then switched to Hydrology)
- M.S. Geochemistry, 1981-84, Institute of Geochemistry, Chinese Academy of Science, China
- B.S., Chemistry, 1977-1981, Beijing University of Iron and Steel Technology, China

Professional Experience

- 1997- present: Staff Geological Scientist, Earth Sciences Division, LBNL
- 1995 -1997: Scientist, Earth Sciences Division, LBNL
- 1993 -1995: Postdoctoral Research Fellow, Earth Sciences Division, LBNL
- 1989 -1993: Graduate Research Associate in Hydrology, New Mexico Tech, NM
- 1984 -1986: Research Associate, Institute of Geochemistry, Chinese Academy of Sciences

Peer-reviewed Publications (H-6656-2014, H-index 29)

Awards and Honors

- "Outstanding Contributions in Geosciences Research" from U.S. Department of Energy Office of Basic Energy Science, August 1998.
- The Langmuir Award, from New Mexico Institute of Mining and Technology, 1995.
- First place as "Outstanding Dissertation Award for the Water Resources" in Environmental and Biological Sciences, The Universities Council of Water Resources, 1993.
- Graduate Student Award, Division of Environmental Chemistry of Am. Chem. Soc. 1993.
- Graduate Student Paper Award, from the American Chemical Society, 1993.

Grant Awards (as lead PI) through Peer-Reviewed Competitive Proposals

- 2008-2010 (\$1.5 M), DOE-BER: Environmental impacts of engineered nano-materials.
- 2006-2008 (\$1.4 M), DOE-ERSP: Hydrological and geochemical studies of alkaline plumes at the 200 Area the Hanford Site.
- 2003-2005 (\$1.2 M), DOE-EMSP: Development of U waste plumes at the Hanford Site.
- 2005-2007 (\$0.6 M), DOE-BES: Nanoparticles fate and transport in the subsurface.
- 2002-2004 (\$ 1.12 M), DOE-NABIR: Coupled transport and bioreduction of U(VI) in sediments.
- 2000-2002 (\$ 1.0 M), DOE-EMSP: Evolution of alkaline-saline waste plumes in the Hanford Site

- 2002-2004 (\$ 0.6 M), DOE-BES: Interfacial properties of colloids and nanoparticles in subsurface.
- 1999-2001 (\$ 1.2 M), DOE-NABIR: Mesoscale biotransformation dynamics of Cr and U
- 1999-2001 (\$ 0.6 M), DOE-BES: Unsaturated flow and colloid transport
- 1997-1999 (\$1.2 M), DOE-EMSP: Sorption of organics and metals onto gas-water interfaces: implications on contaminant transport and remediation
- 1996-1998 (\$ 0.6 M), DOE-BES: Colloid transport in unsaturated porous media.

Service to Scholarly Journals as a reviewer for:
